Members On Line Pro 2.2 Module Mammeter List

All of the modules have Mammeter capability built into the module (See: Working with the Parameters box in the articles section for more information on Mammeter use). The Members On Line Pro module also incorporates the use of Mammeters and below is the a descriptive list of those Mammeters.

This module is a rewrite of the previous Members On Line module. By default your Guests show at all times and each group shows when on line only.

Works with: Mambo OS Version 4.5

Mammeter
 Default
 Description

BorderSize
 BorderSize=0

The table border will not show when this Mammeter is set to 0. When set to a higher value the table border will display. Normal values would be 0 or 1 and a value of 1 would produce a border of 1 pixel around all tables. This Mammeter is measured in pixels.

Also see: MembersBorderColor, TitleBorderColor

GroupsTableWidth
 GroupsTableWidth=90%

This Mammeter sets the table width for Guest, Users, Editors, Totals, Online Totals and Statistics. Takes a string in the form of a 90% (e.g., 90%) and the percent sign is required. You may also pass a string value that would be measured in pixels (e.g, 120), without the percent sign (%).

Also see: TopTableWidth

MembersBorderColor
 MembersBorderColor=#808080

This option sets the border color for the Member Groups, Totals and Statistics. Takes any hex value (e.g., #cccccc, pound # sign is required when using the hex value) or IE color name (e.g., Gray).

Also see: TitleBorderColor

MembersTitle
 MembersTitle=Member Groups

In the top table you'll see two titles that can be modified if you choose. This one represents the member groups and is positioned above the group names. Takes a string as a Mammeter.

Also see: OnlineTitle, ShowTopTable, TopTableWidth

OnlineTitle

OnlineTitle=Online Now

This is the second title and is positioned above the member group counts. This can be changed to whatever you like. Takes a string as a Mammeter.

Also see: MembersTitle, ShowTopTable, TopTableWidth

ShowAdmins

ShowAdmins=yes

This Mammeter works in the same manner as ShowSuperAdmins, but applies to ShowAdmins.

ShowAuthors

ShowAuthors=yes

This Mammeter works in the same manner as ShowSuperAdmins, but applies to ShowAuthors.

ShowEditors

ShowEditors=yes

This Mammeter works in the same manner as ShowSuperAdmins, but applies to ShowEditors.

ShowManagers

ShowManagers=yes

This Mammeter works in the same manner as ShowSuperAdmins, but applies to ShowManagers.

ShowMemberCount

ShowMemberCount=no

Use this Mammeter to show the member count table. This table shows the number of registered users to your site. Set this Mammeter to yes to show the table or no to not show the table.

ShowMOPStats

ShowMOPStats=yes

Set to yes (default) to display simple statistics about your members (Newest member, New Today, New This Week, New This Month).

ShowOnlineCount

ShowOnlineCount=yes

This Mammeter is used to show a total count of all group members that are currently on line (default, yes). Use no to turn this feature off.

ShowOnlineOnly

ShowOnlineOnly=yes

Members show only when they are on line by default (the yes value). Change this value to no to show all member groups.

ShowOwnerLink

ShowOwnerLink=yes

A value of yes will display a return link to webraydian.com for others to download MOP, while using no will hide the return link.

ShowPublishers

ShowPublishers=yes

This Mammeter works in the same manner as ShowSuperAdmins, but applies to ShowPublishers.

ShowSuperAdmins

ShowSuperAdmins=yes

The default value yes tells the script to display Super Admins when they are on line. Use 'no' to keep Super Admins from displaying when on line.

ShowTopTable

ShowTopTable=yes

This Mammeter controls the display of the Header table (Member Groups, Online Now titles). Set to yes to show the header and no to hide header table.

Also see: TopTableWidth

ShowUsers

ShowUsers=yes

This Mammeter works in the same manner as ShowSuperAdmins, but applies to ShowUsers.

ShowUsersOnline

ShowUsersOnline=yes

When registered users are on line you can display a list of usernames if this Mammeter is set to yes. Set to no if you would like to hide this feature. Currently, shows only registered members of the users group.

Also see: UserOnlineLimit, UseRealNames

TableAlign

TableAlign=center

Adjusts the position of the output within the Mambo Module Tables.

TextColor

TextColor=#0

By default the text color is set to use your mambo templates CSS, but can be modified by using a valid hex color value preceded by a # (pound) sign or an IE color name. Reset color to default CSS by using #0 or removing this Mammeter from the parameters box.

TitleBorderColor

TitleBorderColor=#000000

This Mammeter is used to set the top table (header table with the titles) border color. Can be modified by using a valid hex color value preceded by a # (pound) sign or an IE color name.

TitlesTrim

TitlesTrim=12

This option is used to trim the text that displays. The default value of 12 will trim all text that is 12 characters or longer and appends '...' to the text string, so the total characters of the text equals 12.

EX: This is a Test String, would be converted to: This is a... which equals 12 characters.

TopTableWidth

TopTableWidth=90%

Use this Mammeter to adjust the top table (Titles Table) width. Takes a string in the form of a 90% (e.g., 90%) and the percent sign is required. You may also pass a string value that would be measured in pixels (e.g, 120), without the percent sign (%).

Also see: GroupsTableWidth

UseImages

UseImages=yes

With this option you can turn images on using yes and turn images off using no.

UserOnlineLimit

UserOnlineLimit=5

When you have users on line this Mammeter will control how many show. This Mammeter takes a positive integer value, that represents the actual number of users that will display.

Also see: ShowUsersOnline, UseRealNames

UseRealNames

UseRealNames=no

This Mammeter can be used to change the member name output from username to real name (whatever was supplied as real name when the user signed up). No, displays username and yes displays real name.

NOTE: Before using the Real Name of your users you may want to state that 'you display Real Names on this website' someplace on your site (privacy policy, etc.).

Install Notes
Usage

Just plug and play!

Enjoy!

Thanks for using Webraydian's Members On Line Pro (M O P) Module.

Additional Notes

General Notes:

All Mammeters are case sensitive and should be entered as you see them above. However, the values (such as yes/no) are not case sensitive and can be entered in any case (e.g., Yes/nO, etc.), with the exception of titles and/or integer values.
