Site Counter is a Mambo 'Hit Counter' replacement that works as both a graphical and text based counter. This module comes with three image styles and nine colors for each style; making a total of twenty-seven different digit sets to display. This is a complete rewrite of the old Site Counter module.

Site Counter allows you to create and use your own images as well. Find out more about Site Counter by viewing the Site Counter Mammeter List below. NOTE: this module is just a simple replacement for the default Hit Counter...

...for Mambo 4.5.0 [Boon]
