Skill level :

The Mambo session table has crashed my site, what can I do?

Error example:

DB function failed with error number 1016

Can't open file: 'mos_session.MYI'. (errno: 145) SQL=SELECT session_id FROM mos_session WHERE session_id=MD5('9...c')

SQL = SELECT session_id FROM mos_session WHERE session_id=MD5('9...c')

This error message will show when your session table is locked and can normally be repaired by using a tool like phpMyAdmin.

How to repair the Mambo session table?

- Login to your phpMyAdmin DB tool.
- Select the DB in question and scroll down to the session table.
- Check the check box next to the table (session table) and select the Repair option from the drop down select list.
