Web101 PSD Image File

The web101 PSD image file is a Photoshop image format file (...Photoshop or a compatible PSD image editor is required to modify this file.), and is pre-sliced and layered for your convenience. Web101 PSD is the image used to create the web101 template for the Mambo CMS.

Why would you want this?

As a designer - you can make as many templates as you please from this PSD file, and sell the finished templates you've created. You may not sell the PSD file for any reason, nor can you sell any derivatives of the Web101 PSD image file. This by itself can save you a great deal of time and allow you to focus on other, more profitable efforts.

For an unique presence - you may want to purchase this file if you are planning on using the Freely available Mambo web101 template on your website or like the idea of having an unique look. By purchasing this PSD file and with the use of Photoshop, you can change the look and feel of your FREE web101 themed site.

Package Includes:

- A layered PSD image file.
- An example Photoshop HTML template based on this image.
- Full rights to redistribute and use any templates you create with this PSD image.
