I was just over at Arthur's site and noticed a new template is available. Now, Arthur doesn't give away these things anymore, but you may still have a use for it. The new Akompany template looks really cool and is a fixed width (the easiest to make) template.

Comes with:

- 200 ready to run, sized header images
- 100 amazing flash headers
- 75 fully transparent, high quality icons
- 40 nice favicons for your website

As Arthur normally does, this template is Blue in color, looks nice and comes with a LARGE 14 page manual. If I wasn't so poor I'd buy it myself. Look here for a preview of Akompany. Did I mention that this template is compatible with Joomla?
