## Member's Online 1.0.beta Module Mammeter List

All of the modules have Mammeter capability built in (See: Working with the Parameters box in the articles section for more information on Mammeter use). The Member's Online module also incorporates the use of Mammeters and below is the a list of those Mammeters.

Mammeter  
Default  
Description

ShowAuthors

ShowAuthors=yes

This Mammeter allows you to change the modules output. If yes, then the Authors section shows only when Authors are online. If no, then the Authors section shows all the time.

ShowSups

ShowSups=yes

Just like the ShowAuthors Mammeter, but applies to the Supervisors (Managers).

ShowAdmins

ShowAdmins=yes

Unlike the ShowAuthors and ShowSups, this Mammeter controls whether or not to show Admins when they're online yes. By default, Admins only show when they are online, but with this Mammeter you can conceal the admins when they are online, by using no.

ShowBorders

ShowBorders=yes

This Mammeter allows you to control the table borders. By default, table borders show (yes). Set this Mammeter to no to turn off table borders.

ShowOwner

ShowOwner=yes

Used to show or not show the owner's link. If yes, show owner's link and no to not show the owner's link.

Install Notes

Usage

This module uses images to define the four groups (Members, Authors, Supervisors and Administrators) and these images are installed for you. Just plug and play!

Enjoy!

Thanks for using Member's Online
