MOP stands for Members Online Pro.

MOP has been tested on Mambo 4.5.0 [Boon] and has no reported problems.

MOP can display all the groups that are currently available in Mambo and has many Mammeters (parameters) to control the modules output. This version is for Mambo 4.5.0 [Boon].

### Brief Options List for v2.2

- Displays guest when online by default
- Can turn off or on groups (hide or show)
- Can display a list of registered users that are online now using user name or real names
- Display totals of all users online and total registered users
- Control the border and table widths and colors
- Displays stats (new member, today, this week and this month)
- Turn image on/off

These are just a few of the options that this module has to offer. Get MOP for Mambo 4.5.1?
