Newsflash Scroller Advanced 1.1 Module Mammeter List

All of the modules have Mammeter capability built in (See: Working with the Parameters box in the articles section for more information on Mammeter use). The Newsflash Scroller module also incorporates the use of Mammeters and below is the a list of those Mammeters.

Mammeter
Default
Description

ScrollOwner

ScrollOwner=true

With this Mammeter you can control the display of the owner's link. If true (default), then the Owners link will show. If false, the Owners link will not show.

ScrollDirection

ScrollDirection=up

Use one of four direction Mammeters to control the direction of scrolling text. The options are up, down, left and right.

ScrollHeight

ScrollHeight=150

This Mammeter is used to adjust the height of the scroll box. This is measured in pixels.

ScrollAmount

ScrollAmount=1

Used to adjust the amount of lines scrolled. Normal values are 1, 2.

ScrollDelay

ScrollDelay=125

This Mammeter controls the scroll speed. The lower the number the faster the scroll. Value range should be between 50 - 200.

ScrollAlign

ScrollAlign=center

Used to align the table output within the Mambo table. Options are center, left, right and justify.

* ScrollCSSOverride

* ScrollCSSOverride=false

This is a special Mammeter used to override your default CSS and allows you to use the below Mammeters to customize your Newsflash output. This must be set to true in order to use any of the Mammeters below.

ScrollTextAlign

ScrollTextAlign=justify

Aligns the actual text of your newsflash output. Options are: center, left, right and justify.

ScrollTextWeight**ScrollTextWeight=normal**

With this Mammeter you can control the text weight of your newflash output. The options are: normal, lighter, bold and bolder.

ScrollTextSize**ScrollTextSize=11**

This controls the text size of your newflash output. This Mammeter is measured in pixels.

ScrollTextColor**ScrollTextColor=#000000**

You can change the text color by using any acceptable hex number or IE color name.

ScrollBGColor**ScrollBGColor=transparent**

You can change the background color by using any acceptable hex number or IE color name.

ScrollMargin**ScrollMargin=4**

Adjusts the table spacing. This Mammeter is measured in pixels.

ScrollBorderBottom**ScrollBorderBottom=1**

This Mammeter adjusts the bottom border width and is measured in pixels.

ScrollBorderTop**ScrollBorderTop=1**

This Mammeter adjusts the top border width and is measured in pixels.

ScrollBorderLeft**ScrollBorderLeft=1**

This Mammeter adjusts the left border width and is measured in pixels.

ScrollBorderRight**ScrollBorderRight=1**

This Mammeter adjusts the right border width and is measured in pixels.

ScrollBorderColor**ScrollBorderColor=#AFAFAF**

This Mammeter adds some color to the borders and accepts any hex color value or IE name.

ScrollBorderOff**ScrollBorderOff=false**

You can globally set the border on or off with this Mammeter by using false for on or true for off.

ScrollBorderSetAll**ScrollBorderSetAll=false**

Override the ScrollBorder ... Mammeters with this option. Use this to set all borders on or off globally. Options are: false is off or any value for a border width.

Install Notes**Usage**

Just plug and play!

Enjoy!

Thanks for using Newsflash Scroller Advanced.
